Groups in Elgg - Creating Educational Communities

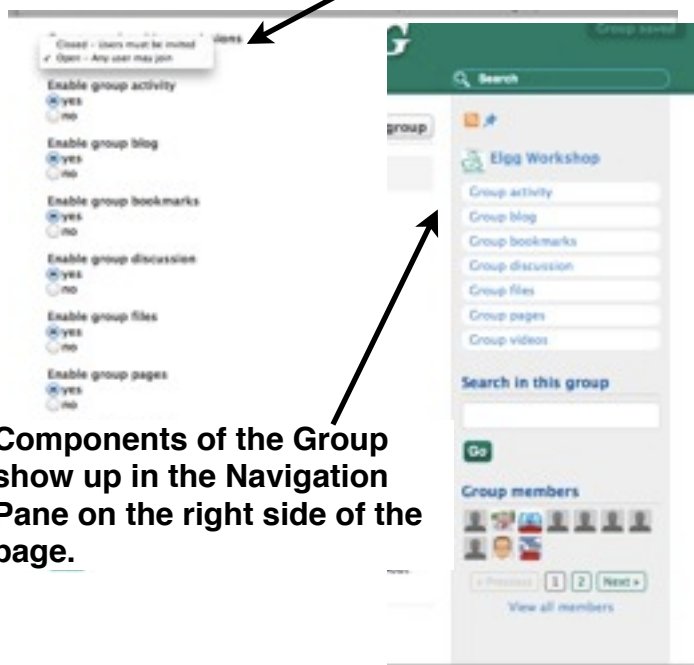

One of the most powerful tools in Elgg is the ability to create **Groups**. Groups allow the classroom teacher to create groups within their classroom for shared interests, shared research, or to create an environment where students can share their learning with fellow students.

1. To create groups simply go to the **Groups** tab and click **Create new group**.

2. Determine what kind of components you would like to have in your group. Just click **Yes** for each component you wish to have for your group - you can always go back and edit the group and enable additional components later.

3. Also, determine if this is an **Open** or **Closed** group. Groups that students create should be open, for other groups make sure you have all of your members in the group and then you can close it. At this point there is no option for us to **Invite** members via email so leaving it open is the best option.

Components of the Group show up in the Navigation Pane on the right side of the page.

Some of the Components of Elgg Groups

On the following pages you will see that all of the components of Elgg are available in Groups. Groups simply allows you to tailor your Elgg environment to a specific group.

Professional Development

1. Blogs: Groups in Elgg provides for the ability to have a group blog. You can limit access of the blog to members of the group.

2. Group Bookmarks: Elgg provides the ability to have *group bookmarks* this is a great way of sharing information for the whole group. You can also use a **bookmarklet**.

3. Group discussions: Elgg allows you to create **Discussion Topics**, users can then elicit responses and reactions to the topic. Topics can be closed after a certain point to *close discussion of topics*.

4. Files: Groups in Elgg give you the capability of sharing documents, videos and pictures with members of the group.

5. Pages: Members can create pages to share their knowledge and generate responses and improvements (like a wiki) or closed like a regular web page.

The image displays five screenshots from the Elgg LMS interface, illustrating various group features:

- Elgg Workshop's blogs:** Shows a list of blog posts, including "What Are the Implications for ELGG in the Elementary Classroom?" and "Using Elgg in the Classroom".
- Elgg Workshop's bookmarks:** Shows a list of bookmarked items, including "The Elgg Community: Moodle and ELGG in Education" and "eLGG: It's a social thing".
- Discussion topics:** Shows a list of discussion topics, including "The Elgg Desktop" and "Web 2.0 content in the classroom".
- Elgg Workshop's files:** Shows a list of uploaded files, including "Elgg Self Assessment" and "Elgg Desktop".
- Elgg Workshop's pages:** Shows a list of pages, including "Classifying K-12 Blended Learning", "Google Docs Integration", "Google Presentations", "Text Video Page", and "Elgg - Social Networks in the Classroom".
